

The Big Bag is the most suitable and economical packaging for transporting and storing all kinds of bulk goods.

This type of flexible packaging is available in a wide range of types and classes, making it the ideal choice for numerous industrial uses.

Highly recyclable and reusable, this type of product helps save on storage space as, when empty, it takes up practically no room at all. What is more, their reduced weight also helps cut transport costs.

The Big Bag has a multi-weave structure formed from stands of polypropylene.

#### Characteristics and Benefits:

- Recyclable and biodegradable.  
They offer unique benefits in even the most demanding sectors and can be easily adapted to meet a wide range of needs.
- They can be loaded and unloaded by a single person.  
[\*They are collapsible, transportable on pallets and can be stored outside.
- Standard and customised formats.
