

For packaging irregular-shaped cargo or objects with polyethylene shrink wrap film, this is the ideal solution for product protection problems. Manual use with propane gas.

CE approved, it comes with a 8-m hose, a regulator fitted with a pressure gauge (1.5 to 3.5 bar), two gloves, a fold-away fixing hook, 360° rotating burner, with automatic start-up for maximum performance, ergonomic synthetic handle and a rapid and rotating power connection.

The **Ráptor shrink wrap gun** (PISR10931) with fast, hassle-free connection is the lightest option on the market (500 g) with interchangeable burners for different strengths.

Its safety handle turns off the flame when the precision trigger is released, immediately shutting off the gas. This cuts both energy use and CO2 emissions.

Its advanced technology keeps the flame at a stable high temperature, allowing you to work faster, achieve better results and boost profitability.

The gun is supplied with its own case containing the following items:

- Raptor shrink wrap gun
- 10 m tube.
- 684 regulator
- Gloves
- 90 Kw burner
- 30 Kw burner
