

Wooden pallets are the most common type of pallet, accounting for between 90% and 95% of all pallets that are used. They are ideal for moving cargo as they can be lifted and moved with forklifts or pallet jacks. At present, the international standard NIMF-15 stipulates that wood used for export purposes must be treated in numerous countries. Our NIMF-15 number is ES-08-0361.

**Characteristics and benefits:**

- Low cost.
- Easy to repair.
- Can be sold second-hand.
- Wooden pallet material within arm's reach.
- At the end of their useful life, wooden pallets can be made into pellets and/or processed for making paper.
- Quick and easy to design.
- Easy production of custom-built pallets.
