

Nestable plastic pallet designed to offer the highest quality at the lowest cost. An ideal choice for exporting all types of products or for transporting and storing goods by weight.

Characteristics and benefits:

- Good use of space
- Stability: They are totally unaffected by humidity and rain, showing no changes in size or shape.
- Especially recommended for all types of exports.
- No special treatment required.
- Low-cost solution
- Lightweight: 75% lighter than traditional pallets, reducing transport costs and improving handling.
- The materials used to make these pallets protect the goods against bacteria and parasites.
- Improved environmental impact as they are 100% recyclable.
