

Wood fibre pallets are made from recycled material which is normally wood waste that has been pulped and then treated and processed to create solid, hard-wearing and uniform structures. The result is a lightweight pallet which is ideal for exporting goods. During manufacture, they are exposed to high-pressure processes and temperatures for guaranteed sterilisation.

Characteristics and benefits:

- Much lighter than solid wood pallets
- Easy to wrap in stretch wrap film thanks to their conical feet
- Easy to stack and transport.
- They take up less space than conventional pallets.
- They have neither screws nor any other connecting elements that could damage the packed goods.
- Environmentally friendly product
- They can be made to various measurements

PFCYD10	PALET FIBRA ENCAJABLE 1000 x 1200 mm.
PFCYD11	PALET FIBRA ENCAJABLE 1140 x 1140 mm.
PFCYD11S	PALET FIBRA ENCAJABLE 1140 x 1140 mm.
PFCYD36	PALET FIBRA ENCAJABLE 400 x 800 mm.
PFCYD46	PALET FIBRA ENCAJABLE 400 x 600 mm.
PFCYD64	PALET FIBRA ENCAJABLE 600 x 800 mm.
PFCYD8LF	PALET FIBRA ENCAJABLE 800 x 1200 mm.
