

Boxes made from cardboard and wood, side walls reinforced with wood and with front and top opening for easy storage and transport of the packed goods.

This model has an opening in the lid and on the front of the box, allowing cargo to be loaded from the front (ideal for cupboards).

Characteristics:

- Maximum strength, protection and conservation of content.
- They can be custom built and designed for both manual and mechanical handling and transport.
- Two types of foldable cardboard can be used to wrap the boxes, covering the side walls to form a closed rectangular tube.
- Available in double or triple wall.
- Additional protective elements available: closure systems, handles, wheels, etc.
- Totally recyclable
