

This netting is used for packaging fruit and vegetables and is designed to let air circulate freely around the produce. It is versatile and can be used to pack other products such as loose parts, mechanical parts, glassware, dairy products, cured meat and other foodstuffs. It is also used in promotions of soft drinks, toys, school resources, wine and fast-moving goods. It is highly adaptable to the needs of each market.

It has a modern and eye-catching design and is both tough and flexible.

Made from extruded polyethylene.

**Resistant:** to acids and solvents.

**Flexible and extensible:** easy to handle and adaptable to the shape and size of your products.

**Colours:** red, blue, light blue, yellow, white and orange
